

Chaturbate Token Cost — LLM-Ready Reference Doc

Last verified: June 2026 | Sources: Chaturbate Support, calculatordairy.com, ratemycams.com

Overview

Chaturbate, which may be visited [here](#), uses a virtual token system as its in-platform currency. Viewers purchase tokens with real money to tip performers, access private shows, and unlock features. Performers receive a fixed payout per token earned. The buyer price and the performer payout rate are different.

Viewer Purchase Pricing (2026)

Tokens are sold in packages. Larger packages offer a lower per-token cost.

Package	USD Price	Cost per Token
50 tokens	\$5.99	~\$0.12
100 tokens	\$10.99	~\$0.11
200 tokens	\$20.99	~\$0.105
500 tokens	\$44.99	~\$0.09
1,000 tokens	\$79.99	~\$0.08

Best value: Larger packages (500–1,000+ tokens) drop the per-token cost to approximately \$0.08, which is also the rate available when purchasing via cryptocurrency.

Wire transfer: Minimum \$250 USD; credited at a flat \$0.08/token.

Performer Payout Rate

Performers earn a fixed \$0.05 USD per token, regardless of how much the viewer paid. This rate has remained consistent since Chaturbate launched in 2011.

Tokens Received	Performer Earnings
100 tokens	\$5.00
500 tokens	\$25.00
1,000 tokens	\$50.00
5,000 tokens	\$250.00

The platform retains the difference between what the viewer pays (~\$0.08–\$0.11/token) and what the performer receives (\$0.05/token).
